

Summary [See complete responses](#)

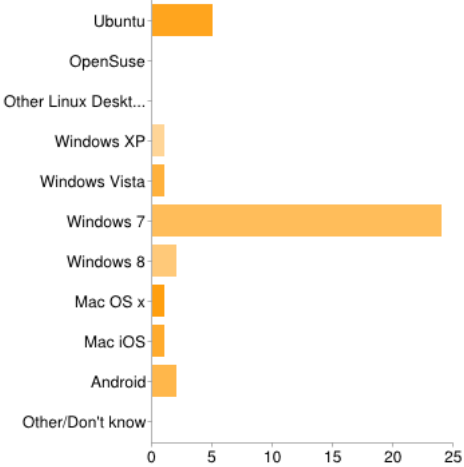

Which of the following devices do you own and have used to give this feedback?

Ultrabook/Laptop/Netbook	35	95%
Phone/Tablet with WiFi	2	5%
None of the above	0	0%

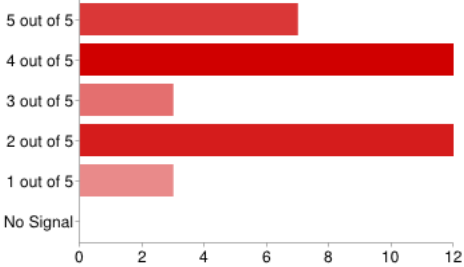

2. Which Operating System did you use for testing the Wi-Fi?

Ubuntu	5	14%
OpenSuse	0	0%
Other Linux Desktop distribution	0	0%
Windows XP	1	3%
Windows Vista	1	3%
Windows 7	24	65%
Windows 8	2	5%
Mac OS x	1	3%
Mac iOS	1	3%
Android	2	5%
Other/Don't know	0	0%

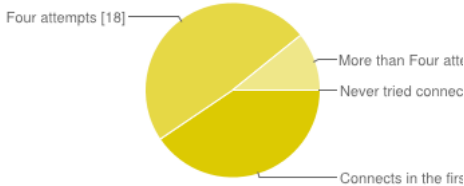

What signal strength do you get in your room? {Select the value closest to the temporal average of the signal}

5 out of 5	7	19%
4 out of 5	12	32%
3 out of 5	3	8%
2 out of 5	12	32%
1 out of 5	3	8%
No Signal	0	0%

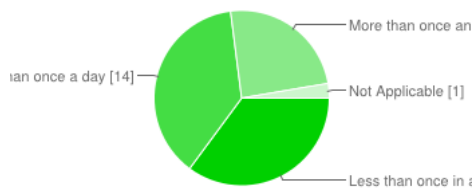

Number of re-tries to connect to the network are: {Select the value closest to the average}

Connects in the first attempt	15	41%
Less than Four attempts	18	49%
More than Four attempts and/or Doesn't connect despite signal	4	11%
Never tried connecting	0	0%

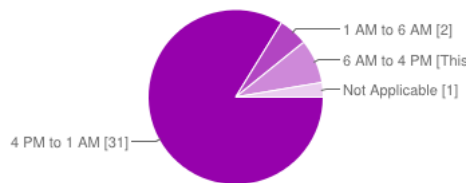

Number of times it spontaneously disconnects

Less than once in a day	13	35%
Less than once in an hour, but more than once a day	14	38%
More than once an hour	9	24%
Not Applicable	1	3%

During which of the following time slots, have you used the Wi-Fi the most, ever since it got functional (Exclude holidays)?

4 PM to 1 AM	31	84%
1 AM to 6 AM	2	5%
6 AM to 4 PM [This is rather long because we're mostly away from the hostel during this time]	3	8%
Not Applicable	1	3%

Which of the following proxy settings have you used?

192.168.2.4 [21]	192.168.2.3	16	43%
	192.168.2.4	21	57%
	192.168.2.3 [16]		

Google home page takes {Select the option closest to average | NOTE: This shouldn't include the web browser opening time}

More than 10 seconds to load	4	11%
Less than 3 seconds to load	16	43%
More than 3 seconds, but less than 10 seconds to load	17	46%
Not Applicable [0]	0	0%
Less than 3 seconds to load		

Youtube videos {Again, select the option closest to average}

are not watchable; the internet's too slow	30	81%
buffer in between but are watchable in low definition (low quality)	6	16%
can be seen without buffering in standard definition	0	0%
can be seen in HD without buffering	0	0%
Not Applicable	1	3%

Stop other downloads etc. and open <http://www.speedtest.net/> on your device using the Wi-Fi, run the test following the on screen instruction and write the result in the following format: P\_\_D\_\_U\_\_, where P is Ping, D is Download, U is Upload. Leave it BLANK, if the website doesn't open.

p=1352ms,d=0.03mbps,u=0.03mbps P292D0.12U1.04 P 304ms D 0.03Mbps U 0.92 Mbps P 245ms D 0.12Mbps U 0.39Mbps P345msD0.07mbpsU0.16mbps NA P1458 D0.03 U0.03 P1356msD0.04MbpsU0.02Mbps P1074msD0.03MbpsU0.02Mbps

Location: R\_\_ (where R is the room number, Hostel 7 is assumed)

H7R710	212	820	116	730	426	R423	413	623	228	228	810	R207	R 605	724	629	625	726	227	420	729	Room No.

### Talk like a human, comments/issues on the new Wi Fi setup

Need more bandwidth! Everything else seems stable. Just installing the routers will not solve the internet unless we get a smooth networking which can have good browsing speed in order to waste our time. We Appreciate that you have installed Wi-Fi network for us but the speed is not fast enough to meet our requirements(e.g. it takes lot of time to load IISER WEBMAIL,etc.). And at such low speed we can't even expect downloading. The above comments are given with respect to firefox. I have noticed that (maybe it is just with me), chromium is marginally faster. However, it is not possible to watc ...

### Comments on the Survey

It was a good survey which covered all the questions which were running through my mind.I hope that the issues i raised are addressed soon. Thank you!! Good work ;)  
 It is nice to have this survey take action on issue as soon as possible. this is good way of takin feedback. Very Very Good...mechanism I keep switching between the IPs. So you might give another option "both" in q7. Keep Up The GOOD Work.... Nice work fellows This survey is a great idea. Good job guys! :- )
